

Quality assurance employee (m/f/d) – metrology & machining

Kuppler GmbH has been a competent partner in large-part machining, vertical turning, and boring mills in Mössingen-Öschingen for over 50 years. As a medium-sized company with 60 employees, we deliver genuine quality work in two shifts on approximately 3,500 square meters of work space. We have accumulated a wealth of experience and can therefore handle our customers' orders to their complete satisfaction. We manufacture components according to our clients' drawings and specifications, either using materials provided by them or, if desired, including the procurement of raw materials. For mechanical engineering, plant construction, and special machine construction, we machine turned parts with diameters from 400 mm to 4,000 mm and lengths up to 2,500 mm. In addition, we can offer milling and boring work up to X 6,000 mm, Y 3,000 mm, and Z 3,000 mm, with piece weights up to 40 tons.

To strengthen our team, we are looking for a

Quality assurance employee (m/f/d) – metrology & machining

YOUR TASKS

- Monitoring compliance with ISO 9001:2015 quality requirements in machining
 - Operating the coordinate measuring machine
 - Managing measuring equipment
 - First article inspection reports
 - Preparing measurement reports
 - In-process measuring on the shop floor
 - Final inspection
- Documentation and root cause analysis in case of deviations
- Leading and developing the employees in operational quality assurance
- Providing support at the machines
- Ensuring customer satisfaction in all quality matters
- Managing the handling of external and internal complaints
- Supporting production in implementing the high quality standards of our products
- Material testing
- Regular day shift, 40-hour week

YOUR PROFILE

- Successfully completed training as a CNC machining mechanic / industrial mechanic / precision mechanic (m/f/d) or comparable technical training
- At least two years of professional experience in mechanical engineering / machining
- Knowledge of metrology and quality inspection
- Strong communication skills, ability to work in a team, and resilience
- Independent, structured way of working
- Confident use of common software (e.g., MS Office / Word)
- Analytical, solution-oriented thinking and a structured, results-oriented approach

WE OFFER:

- A long-term, secure position at an expanding, forward-thinking, and healthy medium-sized company
- Comprehensive training in your area of responsibility
- An open work atmosphere in a modern environment with short decision-making paths
- A pleasant work environment with opportunities for personal growth
- Independent, self-directed work style
- 30 days of vacation with a flex-time account
- Company bike available after the probationary period
- Cafeteria subsidy
